## N ote to teachers:

We hope you and your class will enjoy these activities as you learn about coal and electricity.
Please let us know how these activities work in your classrooms or if you have suggestions to improve them. We are always looking for new coal-related activities, so if you have one you would like to share, please contact us so it can be included in future editions of this publication.

## Cookie M ining

## OBJECTIVE:

Students will demonstrate economics skills in a simulated mining activity.

## CONCEPT:

- Coal mining is a capital-intensive industry.

## SKILL REINFORCEMENT:

Critical thinking
M ath-number manipulation
Cooperative learning
Evaluation of multiple factors
N egotiation and compromise

## GRADE LEVEL:

3-12
TIME NEEDED:
One or two class periods

## MATERIALS:

- play money
- worksheet
- grid paper
- pencils
- three different types of chocolate chip cookies
- flat toothpicks
- round toothpicks
- paper clips

## PROCEDURE:

1. Each student starts with $\$ 19$ of play money.
2. Each student receives a Cookie M ining worksheet and a sheet of grid paper.
3. Each student must buy their own " mining property," which is a cookie. Only one " mining property" per player. Cookies are for sale:

M other's Chocolate Chip - \$3
Chips A hoy - \$5
Chips Deluxe - \$7
4. A fter the cookie is purchased, the student places the cookie on the grid paper and, using a pencil, traces the outline of the cookie. The student must then count each square that falls inside the circle. Count partial squares as a full square.
5. Each student must buy their own "mining equipment." M ore than one piece of equipment may be purchased. Equipment may not be shared betw een students. M ining equipment for sale is: Flat toothpick - \$2
Round toothpick - \$4
Paper clips - \$6
6. $M$ ining costs are $\$ 1$ per minute.
7. The sale of one chocolate chip mined from a cookie results in a $\$ 2$ profit. (Broken chocolate chips can be combined to make one whole chip).

## Cookie M ining

8. After the cookie has been " mined," the cookie should be placed back into the circled area on the grid paper (reclamation). This can only be accomplished using the mining tools - no fingers or hands allowed. Reclamation costs are $\$ 1$ for each square covered outside original outline.

## RULES:

1. N o student may use their fingers to hold the cookie. The only things that can touch the cookie are the mining tools and the paper on which the cookie is sitting.
2. Students should be allowed a maximum of five minutes to mine their cookie. Students who finish mining before the five minutes are used up should only credit the actual time spent mining.
3. A student can purchase as many mining tools as desired and the tools can be of different types.
4. If the mining tools break, they are no longer usable and a new tool must be purchased.
5. The students who make money by the end of the game win (because they realized a mining profit).
6. All students win at the end of the game because they get to eat the remains of their cookie!

## REVIEW:

The game provided each student an opportunity to make the most profit that he/she could make with the resources provided. Students were forced to make decisions to determine which properties to buy and which piece or pieces of mining equipment should be purchased.
Each student should have learned a simplified flow of an operating mine. Also, each student should have learned something about the difficulty of reclamation, especially in returning the cookie back to the exact size that it was before " mining" began.

## ACTIVITY DEVELOPED BY:

Women In M ining Education Foundation

## Cookie M ining Worksheet

Name: $\qquad$ Date: $\qquad$

M ining start-up funds $=\$ 19$
A. Land acquisition costs = price of cookie (M other's - \$3; Chips A hoy - \$5; Chips Deluxe - \$7)
N ame of cookie $\qquad$ \$ $\qquad$
Size of mine = size of cookie
Squares covered pre-mining (used for reclamation) $\qquad$
B. Equipment costs

Flat toothpick $\qquad$ $x \$ 2=$ $\qquad$
Round toothpick $\qquad$ x \$4 = $\qquad$
Paper clip $\qquad$ $x \$ 6=$ $\qquad$
Total equipment costs
\$
$\qquad$
C. $\quad$ ining/excavation costs $=$ chip removal

Number of minutes $\qquad$ x \$1 $\qquad$
Total excavation costs
\$ $\qquad$
D. M ining valuation
$N$ umber of chips mined $\qquad$ x \$2

## Gross profit

\$ $\qquad$
E. Reclamation

Squares covered outside original outline $\qquad$ x \$1

Total reclamation costs
\$ $\qquad$
F. Profit/loss

Start-up funds $\qquad$
less total mining costs $(A, B, \& C)$ $\qquad$
less total reclamation costs (E)
plus gross profit (D) $\qquad$
Total profit/loss

## Coal Dough
